

Pre-Requisites

Electrician's Licence or Electrician (supervised)
Worker's Licence

Course Duration

6 days (8am - 4pm)

Mode of Study

On-campus

Dates, Cost and Registration

Course dates, fee information including NECA member discounts and registration can be found at www.necaeducation.com.au/gridconnect

Course Information

The course provides licensed electricians with the skills to design, install, set up, test, fault find, repair and maintain grid connected photovoltaic systems and the associated equipment.

This course runs over five days and will provide you with the necessary qualifications to apply for accreditation from the Clean Energy Council for the Grid Connect PV Systems accreditation.

This course includes the following unit competencies:

UEENEEK125A – Solve basic problems in photovoltaic energy apparatus and systems

UEENEEK135A – Design photovoltaic grid connected power supply systems

UEENEEK148A – Install, configure and commission photovoltaic grid connected power systems

State of the art facilities

NECA Education & Careers has a purpose built state-of-the-art training facility. Boasting cutting edge technology and equipment to support today's interactive learning environment giving you access to the current tools of the trade.

Industry Connection

NECA Education & Careers is the only Victorian Registered Training Organisation (RTO) that is electrical industry owned and operated. This allows for industry input into curriculum ensuring you are industry ready.

ABN: 53 054 944 366 | TOID: 20198
